

Dear Valued Customer,

You may have read recently that the Chinese government has initiated shutdowns of some factories and reduced power-plant production prior to the Olympics. Six provinces and municipalities are impacted including Hebei, Inner Mongolia, Shandong, Shanxi, Tianjin and Beijing.

At this time, we have no reason to anticipate an impact to Freescale operations or supply during the government mandated closures of certain factories prior to the Games. In addition, Freescale has developed contingency plans should factory interruptions of any kind occur and we will keep you informed of any potential disruptions.

If you have any questions, please let me know.

F. Fortun  
Silica Corporate Account Manager  
Freescale Semiconductors
